2010 County Highlights

- ♦ Significant funding received to address healthy eating and physical activity through Partners for Active Living (PAL), the Hub City Farmer's Market (HCFM), the Childhood Obesity Task Force (COTF), and the Mary Black Foundation (MBF).
- ♦ Active living infrastructure greatly enhanced through additions of bike lanes, walking trails, intersection improvements and promotion of outdoor recreational activities.
- ♦ Healthier eating opportunities realized through creation of mobile produce market, senior and WIC voucher expansion, and school and community garden projects.

Where and how changes can be made in all counties:

Community:	Construct new trails or greenways, construct bike lanes, create farmer's markets, increase cropland acreage harvested for fruit and vegetables
Schools:	Implement a Safe Routes to School program, participate in a fruit and vegetable program, incorporate physical and nutrition education into the curriculum
Worksite:	Implement a healthy eating policy, establish a breastfeeding-friendly worksite,
Child Care:	Limit sedentary time for children, establish a school garden, participate in "Fresh on Campus" program

¹The Centers for Disease Control (CDC) defines overweight as having a body mass index (BMI) between 25 (lbs./in²). and 29.9 (lbs./in²). Obesity is defined as having a BMI greater than 30 (lbs./in²). For children age 2 to 20 years old, CDC has developed a definition of overweight and obesity based on the 2000 CDC growth charts for age and sex. Children and youth who are between the 85th and 95th percentiles are considered overweight; children and youth who exceed the 95th percentile on these charts are considered obese.

²The physical activity recommendation says that adults should do at least 150 minutes (2 hours and 30 minutes) a week of moderate-intensity, or 75 minutes (1 hour and 15 minutes) a week of vigorous-intensity aerobic physical activity or a combination of the moderate and vigorous-intensity physical activity.

³ Recommended fruit and vegetable consumption is 2+ fruits and 3+ vegetables daily.

*Obese and not meeting recommended physical activity data are age-adjusted

** *Healthy People* provides science-based, 10-year national objectives for improving the health of all Americans. *Healthy People* has established benchmarks for these objectives and monitored progress over time. www.healthypeople.gov

Obesity can lead to such health risks as elevated cholesterol, diabetes, high blood pressure, sleep apnea, orthopedic complications, and mental health problems.
